## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 37-53 and 92-96, drawn to a method, an apparatus or an article of manufacture for generating or estimating an entropy distribution, classified in class 382, subclasses 166 and 232.
  - II. Claims 10-36, 54-57, 65-77 and 83-86, drawn to a method, an apparatus or an article of manufacture for performing image segmentation, classified in class 382, subclass 170.
  - III. Claims 58-64, 78-82 and 87-91, drawn to a method, an apparatus or an article of manufacture for scaling and or cropping an image, classified in class 382, subclass 298.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as generating or estimating an entropy distribution; invention II has separate utility such as performing image segmentation; invention III has separate utility such as scaling and or cropping an image. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Specification***

5. On p. 1, paragraph [0001], line 3: the application number is missing.

6. Claims 65, 66, 69, 70, 72, 73 and 95 are objected to because of the following informalities:

- Regarding claim 65, and similarly claims 69 and 73: the phrase “segmenting an image” in line 2 appears extraneous; otherwise the sentence does not make sense – or should it be “segmenting an image **by** generating ...”? In addition, lines 4-5 also appear to be extraneous since they are nearly identical to lines 2-3 (starting from “generating”) except for the articles “a” and “the”

- Regarding claim 66, and similarly claim 70: "filling" in line 3 should have been "fitting"
- Claim 72 should have been dependent from claim 69, instead of claim 65
- Claim 95: "distribution" in line 2 should have been "compression"

Appropriate correction is required.
